

Århus November 15 2013

**Postgraduate course in
Applied Statistical Analysis with Missing Data
November 27, 28 and 29 2013**

Dear Participant

You will find an outline of the programme on the homepage:

www.biostat.au.dk/teaching/missingdata

Things you have to do before we meet:

1. Make sure you have a laptop with an updated version of Stata **12 or 13**.
2. Work with (and hopefully solve) the enclosed exercise.
3. We have allocated time during the course to discuss some of you projects (of course we will not be able to go through all of your 24 projects).
If you want us to consider your project, then mail a **short** presentation (powerpoint or pdf) of your study and the missing data problem you have or expect to get to

morten@biostat.au.dk
before Monday November 25th.

Sincerely

Henrik Støvring and Morten Frydenberg

Section of Biostatistics
Department of Public Health
